

Attestation E1-221

Herewith it is confirmed that in the first half of 2021, performed on 15.06.2021, a regular supervision of the product

Birch plywood EN 636-2

plywood, birch, phenolic-formaldehyde (PF), unfaced
in the thickness range: 12 mm ≤ 25 mm

manufactured by

**A/S Latvijas Finieris
mill "Lignums"
Finiera iela 6
1016 Riga
Latvia**

was carried out by the approved supervision body (NDS08)

Fraunhofer Institute for Wood Research

Wilhelm-Klauditz-Institut WKI
Bienroder Weg 54E, 38108 Braunschweig, Germany

according to supervision contract no. 221 dated April 11, 1996. It was found that the requirements on personal and equipment are suitable to produce the product in an adequate way and the factory production control meets the requirements of the "Regulation on the classification and external supervision of wood-based panels regarding formaldehyde emission (DIBt - Guideline 100)" dated June 1994. This attestation is part of the evaluation report. The continuous external supervision of factory production control shall take place twice a year.

Attestation E1-581

Herewith it is confirmed that in the first half of 2021, performed on 15.06.2021, a regular supervision of the product

Birch Plywood EN 636-1

plywood, birch, melamine-urea-formaldehyde (MUF), unfaced
in the thickness range: $> 12 \text{ mm} \leq 25 \text{ mm}$

manufactured by

**A/S Latvijas Finieris
mill "Lignums"
Finiera iela 6
1016 Riga
Latvia**

was carried out by the approved supervision body (NDS08)

Fraunhofer Institute for Wood Research

Wilhelm-Klauditz-Institut WKI
Bienroder Weg 54E, 38108 Braunschweig, Germany

according to supervision contract no. 581 dated August 20, 2013. It was found that the requirements on personal and equipment are suitable to produce the product in an adequate way and the factory production control meets the requirements of the "Regulation on the classification and external supervision of wood-based panels regarding formaldehyde emission (DIBt - Guideline 100)" dated June 1994. This attestation is part of the evaluation report. The continuous external supervision of factory production control shall take place twice a year.

Attestation E1-265

Herewith it is confirmed that in the first half of 2021, performed on 15.06.2021, a regular supervision of the product

Birch plywood EN 636-2

plywood, birch, lignin-phenolic-formaldehyde (LPF), unfaced
in the thickness range: > 12 mm ≤ 25 mm

manufactured by

**A/S Latvijas Finieris
mill "Furniers"
Bauskas iela 59
1004 Riga
Latvia**

was carried out by the approved supervision body (NDS08)

Fraunhofer Institute for Wood Research

Wilhelm-Klauditz-Institut WKI
Bienroder Weg 54E, 38108 Braunschweig, Germany

according to supervision contract no. 265 dated February 26, 1999. It was found that the requirements on personal and equipment are suitable to produce the product in an adequate way and the factory production control meets the requirements of the "Regulation on the classification and external supervision of wood-based panels regarding formaldehyde emission (DIBt - Guideline 100)" dated June 1994. This attestation is part of the evaluation report. The continuous external supervision of factory production control shall take place twice a year.
