

**Veneer** : Birch veneer 1,45mm thickness.

**Gluing**: Is applied Phenol-Formaldehyde WBP (Waterproof) resin imported from Turkey made at "Polisan Kimya" company, E1 Emission of formaldehyde, according with European rules.

**Sanding**: The product is sanded both sides and is calibrated at the thickness with tolerance between plywoods of  $\pm 0.2$ mm

**Certificates:**

**Euro1** certificate (0% custom taxes for importing our plywood in European community)

**Labour test for Phenolic emission** (soon we will have EN certificate for Emission of formaldehyde)

**Certificate of Standard conformity**

**Remarks**: The product is resistant to moisture, the plywood is made of birch veneer - of whole sheets, being joined with a transverse layer and a longitudinal, we want to note that all veneer layers are whole sheets, having surfaces sorted by categories being used transversely and longitudinally, being polished and calibrated to the same thickness with a very low tolerance, which makes this product fit into superior quality.
